

FEDERATION AERONAUTIQUE INTERNATIONALE
AEROMODELLING COMMISSION (CIAM) - PROPOSAL FORM

Date: 17. October, 2008

Proposal submitted by: F3C Subcommittee

Sporting Code Volume: VOLUME F3 Radio Control Helicopters

Heading of section: 4C – MODEL AIRCRAFT – F3C, HELICOPTERS

Class: CLASS F3C HELICOPTERS

Number & heading of the paragraph: ANNEX 5D and ANNEX 5E

Page number if appropriate:

Type the instruction in the space below:

Remove specification that Motor/Engine must be off during all Autorotations. Instead, specify that IC engine power must be reduced to idle.

Type the text changes in the space below (show deletions as ~~strike-through~~ and additions as **bold underlined**):

Type the reasons in the space below:

With the introduction of electric power systems it is almost impossible for the judges to verify that the motor has been shut off. In addition, it is much safer if the IC engines' power is reduced to idle.

Type any supporting data for the proposed technical amendments in the space below:
