

# FEDERATION AERONAUTIQUE INTERNATIONALE

## AEROMODELLING COMMISSION (CIAM) - PROPOSAL FORM

Date: 04.11.08  
Proposal submitted by: Norway  
Sporting Code Volume: SC4 Vol F3C  
Heading of section: SC4 Volume F3C  
Class: F3C  
Number & heading of the paragraph 5.4.13  
Page number if appropriate: 9

Type the instruction in the space below:

*Add a sentence after transmitter & frequency control*

Type the text changes in the space below (show deletions by strikethrough and additions as **bold underlined**):

"In the case where all competitors utilize Spread Spectrum (SS) technology the organizer is not required to use a transmitter impound. Spread Spectrum transmitters are not required to be impounded."

Type out the reasons in the space below:

Transmitters that utilize Spread Spectrum technology are not prone to mutual interference. When all competitors use SS technology a transmitter impound is not necessary. For competitors entering with non SS systems a transmitter impound must be provided and the present rule stands. (For World Championships it is recommended that only SS systems be allowed to make the random draw for the start order much easier.)

Type out supporting data for proposed technical amendments in the space below:

STILLING = SENDING FRA MINNE

START=12-NOV 13:57

SLUTT=12-NOV 13:58

FIL NR.=529
